Energy & Climate Change

Energy

Course Overview

Energy & Climate Change: a 5-day professional training course from LTC Consultants, delivered in-classroom across Africa and live online.

What You Will Achieve

- Understand climate science well enough to engage credibly, briefly
- Explain the policy toolkit: carbon pricing, CBAM, disclosure mandates
- Assess how the energy transition reshapes your sector's economics
- Build the outline of a credible organisational decarbonisation pathway
- Engage lenders, regulators and customers on transition plans

Who Should Attend

Managers, engineers, sustainability officers, finance professionals and policy staff whose organisations face carbon costs, disclosure requirements or transition pressure.

Course Outline

1. Climate science: the fifteen-minute credible version
2. The global policy architecture: Paris to national plans
3. Carbon pricing: taxes, markets and South Africa's regime
4. Border adjustments and trade exposure for African exporters
5. The changing power system: renewables, storage, grids
6. Corporate disclosure: TCFD-style reporting in practice
7. Decarbonisation pathways: abatement curves and sequencing
8. Workshop: your organisation's transition exposure map
