International Hydrocarbon Safety

Health, Safety and Environment (HSE)

Course Overview

International Hydrocarbon Safety: a 5-day professional training course from LTC Consultants, delivered in-classroom across Africa and live online.

What You Will Achieve

- Explain the core principles and current good practice in International Hydrocarbon Safety
- Apply practical tools and techniques for International Hydrocarbon Safety in your own organisation
- Analyse real-world scenarios and select the right approach with confidence
- Avoid the common pitfalls that undermine International Hydrocarbon Safety in practice
- Build a personal action plan to implement what you have learned

Who Should Attend

HSE managers and officers, operations and site managers, supervisors, safety representatives and anyone accountable for workplace safety.

Course Outline

1. Foundations of International Hydrocarbon Safety: principles, terminology and context
2. The business case: why International Hydrocarbon Safety matters to performance
3. Core tools, frameworks and methods
4. Applying the tools: guided case study and exercises
5. Common pitfalls and how experienced practitioners avoid them
6. Working with stakeholders: communication and influence
7. Measuring results and continuous improvement
8. Personal action planning and course review
