

Mastering Power BI

Data Management and Analytics

Course Overview

Mastering Power BI: a 5-day professional training course from LTC Consultants, delivered in-classroom across Africa and live online.

What You Will Achieve

- Import and transform messy data reliably with Power Query
- Build proper data models: star schemas, relationships and date tables
- Write DAX measures with confidence, including time intelligence
- Design reports that communicate: visuals, interactions, performance
- Publish, refresh and share securely through the Power BI service

Who Should Attend

Analysts, accountants, managers and reporting professionals who work with data in Excel and are ready to build proper interactive reporting. No prior Power BI experience needed.

Course Outline

1. Power BI landscape: Desktop, Service and licensing
2. Power Query: importing and cleaning real messy data
3. Data modelling: star schemas and relationships done right
4. DAX foundations: calculated columns versus measures
5. Time intelligence: YTD, prior year, moving averages
6. Report design: visuals, slicers and user experience
7. Performance and refresh: keeping reports fast
8. Publishing and sharing: workspaces, apps, security
