Prototyping with AI

AI (Artificial Intelligence)

Course Overview

Prototyping with AI: a 5-day professional training course from LTC Consultants, delivered in-classroom across Africa and live online.

What You Will Achieve

- Use AI assistants to build working prototypes without writing code from scratch
- Write prompts that reliably produce what you actually asked for
- Chain AI tools with spreadsheets, forms and automation platforms
- Judge where AI output can be trusted and where human review is non-negotiable
- Take a real idea from your workplace to a clickable prototype during the course

Who Should Attend

Product managers, analysts, marketers, entrepreneurs and operational professionals who want to build and test ideas themselves. No programming background required.

Course Outline

1. The new prototyping landscape: what AI changed
2. Prompt craft: instructions, context, examples, iteration
3. Building your first working prototype: guided lab
4. Connecting the pieces: AI plus no-code automation
5. Data care: privacy, confidentiality and what never to paste
6. Reliability: hallucination, testing and human checkpoints
7. From prototype to pitch: demonstrating value
8. Capstone: your workplace idea, built and presented
